

Waiting Times for Cardiff and Vale Patients for the previous 6 months based on the 90th percentile

Cardiff and Vale University Health Board is the operational name of Cardiff and Vale University Local Health Board.
Information Services Department

Explanation of the Referral To Treatment waiting time and how the 90th percentile is calculated

The information in this report is only to be used as a guide. This data cannot tell patients where they are on the waiting list, it's aim is to give an understanding of the spread of waits

Everyone is an individual and care is managed based on clinical urgency.

We would expect that people who have a higher clinical need to have shorter waiting times

Whilst we have national waiting times targets, waiting times will differ by specialty and location during this recovery period and we are working to improve them over time

Note that this report reflects the overall main specialty wait. The wait times for subspecialties (e.g. for Orthopaedics - Spines, foot & ankle, hip etc) are taken into account but are not displayed separately in this report. The sub-specialty waits can vary compared to the main specialty wait.

The waiting time information shown is not live data but is based on patients actively waiting in an end of month snapshot

The waiting time is calculated by ordering the weeks waiting in ascending order, locating the point of the 90th percentile patient and taking the weeks wait. This means 90% of patients are waiting within this time

The first table represents patients waiting at the end of each month on an open clock of a reportable RTT Waiting list - All Pathways Stages

The second table represents patients waiting at the end of each month on an open clock of a reportable RTT Waiting list - New Outpatient Stage

The patients sampled are only those who live within Cardiff and Vale UHB catchment.

The waiting times are as reported to Welsh Government.
